

## 1/2" ADJUSTABLE HEIGHT STEM

WT570

**Adjustable Height Stem (18-33 inches) - For use with most 12-Volt path and spread fixtures. Corrosion resistant aluminum alloy with baked thermoset powder coat finish. Stem allows fixture height to be extended for plant growth. Used with in-ground support stakes (order separately)**

The adjustable height stem is designed for use with 12 VOLT fixtures ONLY.

- 1) Extend stem to maximum height by loosening clutch and pulling stem up. Re-tighten clutch.
- 2) Thread fixture onto adjustable height stem. Adapter included with stem to allow mounting 1/4 NPSM threaded stem to 1/2 NPSM threaded fixtures. Pass fixture wires through stem before threading together.
- 3) Select mounting accessories, see instructions provided with each fixture.
- 4) For fixture assembly, see instructions provided with each fixture.
- 5) To adjust fixture height after mounting on stem, loosen clutch and adjust fixture to desired height. Always grasp lead wire at the base of stem while adjusting to allow proper feeding of wire through stem.
